

Greater Akron Aquarium Society
Native Fish Collection Summer Outing
Saturday, June 20, 2026 - 9am

Water Works Park - 2025 Munroe Falls Avenue, Cuyahoga Falls, Ohio, 44221. When entering the Water Works Family Aquatics Center, from Munroe Falls Ave, stay to the right and continue straight through the tunnel to enter the park. Continue straight to park in the central loop, or turn left for additional options, including disabled access near the restrooms.

We will meet at 9 am at the waterfront stairs directly above the central parking loop, and conclude around noon. Please feel free to stop by anytime during that window to participate. We recommend bringing nets, buckets, bags, and specimen containers for viewing fish. It is also a free fishing day for the State of Ohio, so no license is required for residents. Bring a fishing pole and bait if you prefer casting.

We will explore the Cuyahoga River and Kelsey Brook, both from shore, and in the water - bring water shoes, boots, or fishing waders if you want to enter the water. For safety, please don't enter the river alone / unsupervised by someone else in the group.

Friends, family, and members of other aquarium clubs are welcome - we hope to see you there!
