Wayne Toven (330) 256-7836 (wtoven@hotmail.com)

Complete auction rules are available at:
www.akronfishclub.com

Spring / Fall Auction Rules:

Once an item is registered, it may not be withdrawn and no minimum bid items will be accepted, there is a 70/30 Split (70% proceeds to seller).

Please inspect all items as all sales are final, buyer beware. GAAS does not guarantee any item and is not responsible for any loss.

Bidders may choose to “Express” an item from a later color group to the current group for a small cash fee.

We suggest bringing no more than five of the same items, both for your return on the item and in the interest of the length of the auction. GAAS reserves the right to sell multiple items from the same seller as lots or to group items. Any items that do not sell for at least \$1 will be considered donations to GAAS.

GAAS may refuse to sell animals that are diseased, deformed, too young to survive, regulated in the State of Ohio, or equipment that is hopelessly damaged.

Foods, medications, filter media and other packaged items must be new and unopened.

A four color dot system will be used to assure a fair mix of different seller's items.

Buyers may pay by cash as they go, or choose to run a tab and pay by cash, check, or credit card (\$10 minimum total for card purchase) when they are ready to leave. Anyone wishing to run a tab will have their driver's license scanned for security reasons. There will be a charge for any check returned for NSF. We unfortunately cannot process Tap-to-Pay transactions with our card reader.

All Items MUST be labeled with:

1. Seller's code (three letters such as initials, followed by a number; example ABC-1, ABC-2 and so on) Check with the registration desk to see if the letter code you want to use has not already been used by someone else. Note that although we will try to track down sellers, illegible or non-labeled items will be sold and considered a donation to the club.
2. The seller's name and phone number or email address.
3. Livestock should be labeled as to Species (common and scientific names if known), Quantity and Sex (if known, using standard terms such as pair, trio, reverse trio, unsexed, etc.)
4. Equipment should be labeled as to its condition (examples: works, noisy, leaks, new, etc.)
